

Consultants & Experts

Interface Consulting's primary resource is our exceptional staff of highly qualified and experienced consultants who have enabled the firm to become a leader in construction consulting. Each consultant offers a unique combination of technical expertise and management experience. This distinguished blend of disciplines and backgrounds provides the Interface Consulting team with the insight to address the subtleties and complexities of the challenges faced in today's construction industry.

From across the nation to around the world, clients have relied on Interface Consulting as their trusted go-to consultant and expert advisor for a variety of technical, commercial, and contractual matters for over two decades. The firm's collective expertise, coupled with its corporate philosophy, is what distinguishes Interface Consulting.

Collective Expertise

Various Disciplines

Project and legal teams recognize the strategic advantage and value that our consultants and testifying experts bring to the table, from the construction site, the boardroom, and the courtroom. Our professionals not only have extensive worldwide experience on different types of projects from the owner and contractor perspectives, but they are well educated, trained, and certified in various disciplines.

Mechanical Engineers	Claims & Dispute Specialists
Civil Engineers	Testifying Experts
Chemical Engineers	Accounting & Financial Experts
Architectural Engineers	Planning Professionals
Construction & Project Managers	Research Analysts
Certified Cost Engineers & Consultants	Technical Writers & Editors
Scheduling Experts	Communication Specialists
Arbitrators	Graphic Artists

Interface Consulting's construction consultants deliver insight and expertise to successfully manage challenging projects and resolve construction disputes. Our experts possess extensive industry experience and have built a solid reputation evaluating complex engineering and construction issues; assessing liability, claims, and damages; resolving disputes through negotiation or mediation; and, when necessary, testifying in litigation, arbitration, mediation, and other alternative dispute resolution proceedings.

Industry Specialists

The consultants at Interface Consulting bring years of hands-on industry experience in their respective areas, including the following:

- Commercial Facilities & Buildings
- Land & Subsea Pipelines
- Marine & Offshore
- Power, Process & Industrial

- Management Consulting

Diversified Assignments & Clientele

The consultants at Interface Consulting have experience working on various types of projects, from a two-hundred-thousand-dollar retail store to a three-billion-dollar offshore platform and pipeline facility. Working in a team environment, from our principal consultants to our professional staff, Interface Consulting provides objectivity and an independent assessment for its clients, including numerous industry-related owners and contractors, as well as their attorneys and insurers. The firm has produced timely and cost-effective results on over 750 projects in more than 35 countries in a variety of business areas.

Corporate Philosophy

Client Focused Culture

What motivates Interface Consulting is the desire to guide our clients so they are successful and improve their bottom line. The company achieves this through what we know best—applying collective experience and specialized services tailored to best fit our clients' needs. We foster a creative working environment that maximizes our strengths and potential to identify solutions, minimize risk, simplify complex issues, or provide strategic guidance to achieve our clients' objectives. We do this with the utmost integrity, guided by our duty to our clients and our goal to exceed their expectations. Interface Consulting believes that our clients' success comes first.

Quality Work Standards

Interface Consulting strives to provide its clients with the highest quality services and work products. To maintain quality, we hire professionals, train them in our proven approaches and methodologies, provide them with the latest technology, monitor their work, and instill in them the desire to achieve the highest standards in their work.

As part of our quality assurance, we assign a principal consultant with the engineering and construction experience and understanding of a project to lead it and determine the right mix of technical, senior, project, and commercial consultants to maximize performance and cost efficiency. The principal consultant directs the team in its comprehensive analysis and preparation of construction claims or position statements based on the findings. If a settlement is not reached, the principal consultant testifies in state and federal courts, mediations, and various arbitration forums.
