Construction Management

Interface Consulting provides expert advisory services to improve our clients' management and administrative processes and contract administration. From the job site and the home office, our construction management experts provide cost-effective solutions to problems that hinder the success of construction projects. Our construction management services are geared toward resolving the challenges our clients face in today's increasingly complex construction industry. Using proven techniques and expertise to develop customized recovery programs, we work with our clients to turn around troubled projects.

- Contract Evaluation
- Change Order Preparation & Analysis
- Project Management
- Constructability Analysis

Management Consulting

Contractors and owners engage Interface Consulting to improve their operations through the development and implementation of innovative yet practical solutions that address complex technical, organizational, and managerial challenges. Our goal is to provide tangible bottom-line value designed to meet our clients' objectives. We offer alternative points of view, tempered with the understanding that solutions must easily integrate into a company's specific culture. Interface Consulting provides our clients with the opportunity to strengthen their competitive position through leading-edge management and business development programs.

- Feasibility Studies
- Turnaround Management
- Strategic Planning
- Industry Trend Studies

Construction Defects

In construction, workmanship and material defects are two of the most common dispute areas. Interface Consulting assists clients in analyzing and evaluating workmanship and materials involving construction defects and determining the underlying root cause of a problem. Clients utilize our services throughout the construction process including up-front drawing and specification compatibility reviews to post-construction forensic analysis.

- Root Cause Analysis
- Standard of Care
- Forensic Defect Evaluation
- Drawing & Specification Review
- Remediation/Repair Recommendations
- Constructability Analysis
